

## SQL Questions

1. List the top 10 highest emitters of CO2 (excluding Land Use Change) from 1990 to 2020.
2. List the 5 countries with the highest temperature change from the previous year in 2021.
3. Write a SQL query to find the top 10 countries with the highest percentage increase in CO2 emissions from 2000 to 2020.
4. Identify the top 2 emitters of Nitrous Oxide and Methane per continent, along with their respective emission values. Provide the country name, emission gas type, and emission value for each selected country.
5. Identify the continents where the average temperature change exceeds the global average temperature change for each year between 2010 and 2020.

The answers for these queries are present in the file: Data Analysis - SQL Queries.sql
